

Wheat Pool Budget

difficult to arrange the overall payment of the mortgage by paying the amount in annual instalments. Alberta Wheat Pool has promptly met the annual payments when due.

A Good Customer of Western Canada

Year in and year out, Scotland has been a consistent buyer of Canadian wheat, and it is interesting to note that in the first six months of this year the country purchased more wheat from Canada than in the corresponding period of the two previous years.

Scotland obtains her wheat supplies from Canada, the United States, Australia and Argentina. She usually purchases in the proportion of two thirds from Canada and one-third from the southern Commonwealth.

It might also be noted here that Scottish bread has the reputation of being the best in the British Isles.

R. D. Purdy Replier To James

On Thursday, September 5th, R. D. Purdy made the following statement to the Calgary Herald, replying to assertions by James Richardson:—
"What is holding up the announcement of the results of the election is the fact that the Government are waiting for the results of the election to be announced by the Government of the United Kingdom."

ment of the minimum price for wheat in western Canada? Ask James Richardson and others of the grain trade," remarked R. D. Purdy, general manager of the Alberta Wheat Pool, this morning.

"Mr. Richardson has publicly denounced the Alberta Pool as being unfair in criticizing him for suggesting that 40c was a fair price for wheat. Now he may not have had the intention

"The Pools are just as anxious to see the Canadian wheat surplus disappear as anyone in Canada, but we will not stand passively by and see the farmers' livelihood in the process. We stand for a fair price for our wheat farmers and consider the Dominion should shoulder

"I am led to believe that the delay in announcing the minimum price is due to the insistence of certain people that it should be a low price in order to enable the open market to function. We do not agree with that stand."

"Mr. Richardson thinks we treated

him unfailingly. However, we consider he had no business attacking the Pool before the committee. Having done so, he cannot expect us to take it lying down. Mr. Richardson cannot truthfully deny that his whole evidence was a criticism of the prices of wheat that have been maintained in Canada. His contention was that they were too high.

Known Only To Historians

Elizabeth King, whose father had been a member of the House of Commons in 1740. One of the most interesting and dramatic episodes in modern British history, and one little known or even forgotten, is the story of the capture of the African slave, who was taken to the West Indies, and who was later sold to the British. The story is told in the book "The African Slave" by the late Sir John Elliott, who was a member of the House of Commons in 1740. The book is a masterpiece of historical writing, and it is a pity that it is not more widely known.

A current story of the time was that Theodore considered his dream of the Queen of the South, and was not without a certain amount of success. Whether he ever got his proposal forward is not known, but it is known that he was a man of great energy and initiative, and that he was a man of great energy and initiative, and that he was a man of great energy and initiative.

The capture, British subjects, and other persons, were taken to the West Indies, and were sold to the British. The story is told in the book "The African Slave" by the late Sir John Elliott, who was a member of the House of Commons in 1740. The book is a masterpiece of historical writing, and it is a pity that it is not more widely known.

At last an ultimatum was sent to the British, and the British were told that they were to be taken to the West Indies, and were sold to the British. The story is told in the book "The African Slave" by the late Sir John Elliott, who was a member of the House of Commons in 1740. The book is a masterpiece of historical writing, and it is a pity that it is not more widely known.

The expedition was well managed, and the British were told that they were to be taken to the West Indies, and were sold to the British. The story is told in the book "The African Slave" by the late Sir John Elliott, who was a member of the House of Commons in 1740. The book is a masterpiece of historical writing, and it is a pity that it is not more widely known.

Napier arrived before Magdala, and the British were told that they were to be taken to the West Indies, and were sold to the British. The story is told in the book "The African Slave" by the late Sir John Elliott, who was a member of the House of Commons in 1740. The book is a masterpiece of historical writing, and it is a pity that it is not more widely known.

Arms for Abyssinia

Expectation to Legal Accord to 1830 Arms Convention

Not only is it legal to export arms to Abyssinia, but the 1830 Arms Convention, signed by Britain, France, Italy and Abyssinia herself, actually gave as one of the reasons for its existence "the object of enabling His Majesty the Emperor of Abyssinia to obtain all the arms and munitions necessary for the defence of his country from external aggression." To continue to withhold arms, then, is to deny the spirit of this convention as well as to flout the principles of common justice. One who has started Italy will have the right to seek and examine all ships suspected of carrying contraband goods destined for Abyssinia. Nor will Abyssinia ever fail to retaliate, for international law in all its justice requires belligerent States to take their own measures, which is no comfort to a State with neither ships nor sea to sail on. Unless the prohibition is immediately lifted from Britain, France, and every other country that follows the Emperor of Abyssinia, the risk of France having sided the aggressor while they hindered the fight, of having assisted the aggressor while they hampered the innocent.

The Golden Age

Man Does Best Creative Work At Thirty-Five

Thirty-five is a golden age in man's productivity, as shown by a study of the creative work of 1,264 famous persons reported in the American Psychological Association. Poets and astronomers are exceptions. The verifiers reach their peak younger; the great generals after 40. Executive accomplishment is not included.

The study was made by Professor Harvey C. Lehman, of Ohio University, Athens, Ohio, to clarify a long-standing controversy whether men do most of their creative work between 20 and 40, or at other periods of life.

Seum Is A Success

New Vaccine Against Influenza Paralyzes Virus

Between 6,000 and 7,000 persons in the United States have received New York health department's new vaccine against influenza. The vaccine is not out of them has yet been reported a victim of the disease. Dr. Maurice Croft, acting director of Ottawa and graduate of McGill University, in his work in the health department's laboratories, has developed the serum for influenza paralyzing. Prepared from the optical column of rhinoviruses.

In Hawaii, there are football leagues in which the players do not wear shoes. The athletes develop great kicking accuracy and punt 80 yards with ease.

A pigeon was shot recently in England for 770s.

Tidal Influence

Scientist Ascribes Moon And Sun May Make Changes On Solid Earth

Suggestion the tidal influence of moon and sun may exert "permanent" disturbing influence on the solid earth's crust, was made at Norwich, England, by W. W. Watt, emeritus professor of geology at the Imperial College of Science and Technology. In his presidential address to the British Association for the Advancement of Science.

In his paper on the "Form, Distribution and Influence of the Continents," Prof. Watt remarked some Alpine geologists have been gravely misled by the "sapper" of rock, out of their original and dense of miles from it. In there are other forces, comparable in its method of action to gravity, but capable of working down the movement of the earth—crust in direction other than downward!" he added.

It is not possible for instance that the tidal influence of the moon and sun, which is producing so much distortion of the solid earth that the solid earth is less than they would be otherwise, and, dragging away from one direction, drawing down the earth's rotation, may exert permanent disturbing influence on the solid earth itself.

The Value Of Affairs

Owing To Deep Root It Will Survive

Growers are sure of their future in three cutting of affairs if they are in a fair rainfall during the growing season. The quick growth of the crop, the one of the features which has made it so popular with farmers everywhere. The yield is 10 per cent higher than that of grasses or root crops. Cattle prefer alfalfa to red clover, and there is not the same danger from blighting.

In recent years when pastures have been scorched by burning sun, with little or no moisture available, the advantages of the deep-rooted alfalfa has been seen. This particular crop has a deep root system, which, although there is no growth which can survive continued dry, but weather.

It is recommended that grazing be stopped, and the alfalfa be cut and a protective top might be made.

Connected Under One Heading

Many And Brandy Sold Together

Shaves and cherry brandy were charged with the same heading in advertisements in Canada's first newspaper. Here is an excerpt from the Halifax Gazette, No. 3, 1760.

To be sold at public auction the night of the 21st of November, at the house of Mr. John Rider, two slaves, viz: a boy and a girl, about three years old; likewise, a purchase of choice old cherry brandy, with sundry other articles.

Men who know it all are seldom able to furnish the proof.

Investigate Wiley Post Crash

Government Experts Give Opinion As To Probable Cause

The U. S. government experts decided that a snow-blown plane and a blizzard of snow were the most probable cause for the crash of the Wiley Post and Ingersoll expedition.

Rogers L. Vidal, air commerce commissioner, making the first report to the commerce department investigation into the disaster some 100 miles from the crash site, said the plane was "probably" following the take-up and climb, the motor failed and the airplane's nose-ventilators could result in such a fatal.

The combination of the plane in a banking turn, Vidal said, "with still high flying speed immediately following the take-up and climb, the motor failed and the airplane's nose-ventilators could result in such a fatal.

The finding of the caribou, Vidal believed, might have occurred as the ship took off with spray, or ice particles forming from the spray, being drawn into the air scoop of the caribou intake.

The department discounted "repeated" testimony of Post and Ingersoll that the plane was "probably" following the take-up and climb, the motor failed and the airplane's nose-ventilators could result in such a fatal.

World Letter Governor

Alberta Premier Says No Need Of Discouraging Offer Of Lieutenant-Governor

Edmonton—Premier William Aberhart says no good reason why Alberta should try to get along with a lieutenant-governor. In this he is in line with the late held of ministerial and members of the late legislature who passed a resolution that the government "will not make no more appointments after January 1, 1930."

A resolution by the government to make no more appointments after January 1, 1930, was passed by the legislature. The government is not looking at its measure so there will be no need of rescinding the motion.

Sentence Not Carried Out

Very Few Canadians Shot For Cowardice In World War

A score of years after the war, Canadians are to be told how many of Canada's soldiers "deserted" or "cowarded" at the front, according to W. L. Clark, in the Windsor Daily Star. The Red Cross official record of the First Division, is to give certain details.

A lot of men were sentenced to be shot, but only a few were really executed. One famous Canadian, regiment went to parade in hollow square every few months and had a number of two soldiers sentenced to death.

These two chaps had a way of getting drunk, beating up a lot of men, and getting into a fight with a Frenchman. The colonel would call the regiment to attention and then, sitting very stiffly on his horse, he would read from an order paper. The men would then be sentenced to death.

The colonel would call the regiment to attention and then, sitting very stiffly on his horse, he would read from an order paper. The men would then be sentenced to death.

Explains White Eggs

A naturalist explains that white eggs are characteristic of birds nesting in trees and bushes, and the whiteness serves to protect the eggs from being seen by the enemy.

Brimming with energy, packed to the limit with power-producing materials, eager for a long life of active service—that's the Eveready Layover.

Built layer upon layer, these flat extra-power cells make a distinct modern advance from old round cell types.

Note the waste air pockets and the numerous delicate wire connections in yesterday's "B" battery compare with today's compact trouble-free Layover while every cubic inch is actively engaged.

If you wait the utmost for your "B" battery dollar, only the Layover will satisfy you.
